

Hey I'm Atif, a current Bachelor of Mechanical Engineering student. I have been the **Islamic Society President for the last 3 years** taking the society from 20 to 100+ active members in our community. My biggest achievement just from this year was **raising £13,000+ in one week**, all going to charity! From bake sales to climbing mount Snowdon, I'm also a **two time winner of the STAAR Awards!**

Along with being president of a society of three years, I developed a very good understanding about the SU and university staff and have developed relationships with them.

How will I make a difference?

- Regular meetings with course reps to ensure that students know their voices are being heard and we can act based on their needs
- Provide drop in sessions to talk about difficulties with studies
- Address the freezing conditions within the campus during winter, this can lead to further stress and not being able to focus properly
- Make all faculties aware of religious and cultural holidays and festivals and get curriculums adjusted to honour these where possible
- Honouring prayer times for students who need to make prayers during the working day

How will I achieve this?

- a regular form or a site where students can always drop their concerns at any point
- Meetings with faculty staff with on a regular basis
- Consistent communications with students to address policy changes within the university
- Events/presentations campus wide, taking YOUR concerns directly and doing my absolute best efforts to make your life at university easier and stress free!
